

# Internship Task Report – OWASP Juice Shop

---

This report summarizes the hands-on cybersecurity task completed using the OWASP Juice Shop platform during the cybersecurity internship. The activity focused on understanding common web application vulnerabilities and ethical hacking practices in a safe environment.

## Objective

The objective of this task was to gain practical exposure to web application security testing and understand vulnerabilities such as SQL Injection and Cross-Site Scripting (XSS).

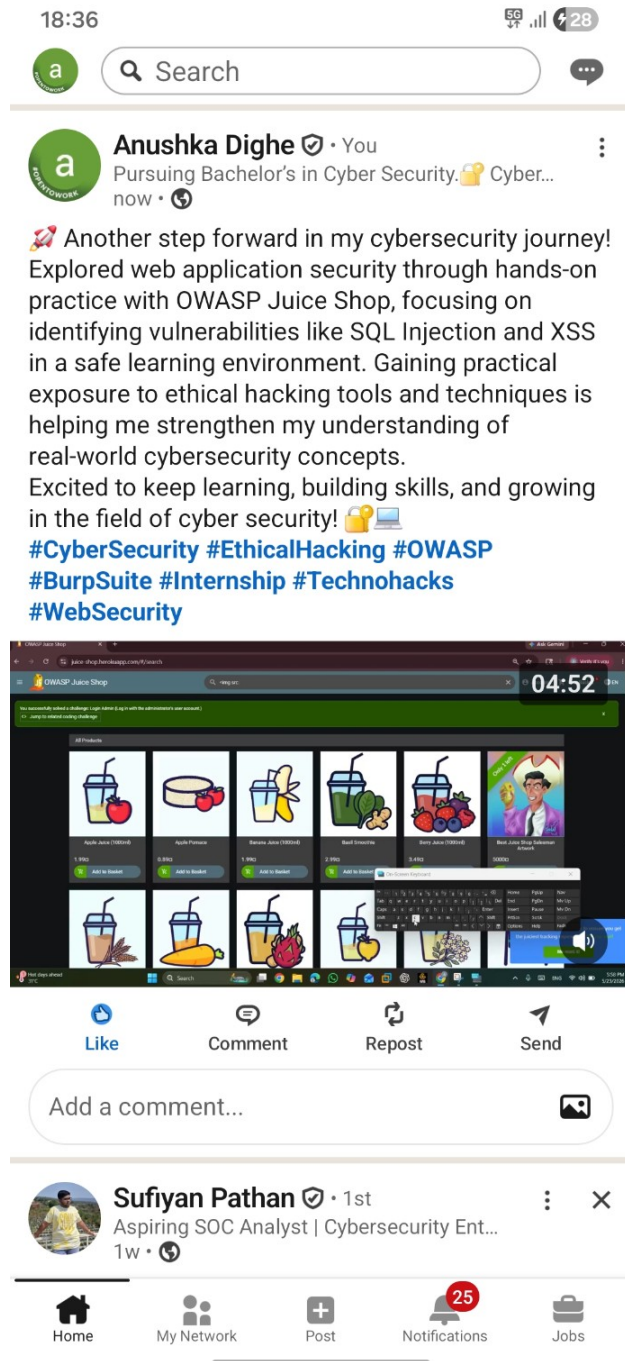

## Tools & Technologies Used

| Tool / Platform  | Purpose                                |
|------------------|----------------------------------------|
| OWASP Juice Shop | Practice vulnerable web application    |
| Burp Suite       | Analyzing requests and vulnerabilities |
| Kali Linux       | Cybersecurity testing environment      |
| Web Browser      | Accessing the application              |

## Learning Outcomes

Learned about SQL Injection and XSS vulnerabilities. Understood ethical hacking and secure testing methods. Improved practical cybersecurity knowledge. Worked in a safe and controlled learning environment.

## Updated Task Screenshot

## Conclusion

This internship task provided practical exposure to ethical hacking and web application security testing using OWASP Juice Shop. The hands-on experience helped strengthen cybersecurity concepts and improve technical understanding of common vulnerabilities.
